

GC IN-LINE CARBON FILTER

The GC In-line Carbon Filter is a simple but very useful device. Designed to attach directly to a room's PVC supply or exhaust line, the activated carbon within the filter box works to trap odors, microbials, and other contaminants. Supply air to a room can be greatly purified to better ensure safety, while exhaust air can be filtered so as to not spread odors or other issues to areas outside the room. The carbon inside the filter can be easily changed at regular intervals to ensure maximum performance.

FEATURES

- ▣ Filters Supply or Exhaust Air to or from a Grow Room
- ▣ Simple to Use and Install
- ▣ New or Retrofit Installation
- ▣ Low Maintenance Design
- ▣ Easily Change Carbon
- ▣ Safety Assurance
