

COMPANY OVERVIEW & SCOPE

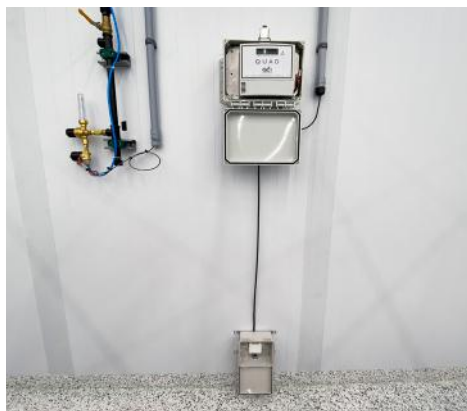

Grow Controlled LLC is rapidly becoming a recognized name in the cannabis world. Customers are hearing our story of expertise in construction, control, energy management, and gastight rooms. We bring our decades of controlled atmosphere storage background, and understand how to design, build, and control a tight environment with industrial and efficient cooling. For example, we are achieving low humidity and temperatures without the use of standard dehumidifiers. This innovation is proving itself with remarkable product our customers are putting to market.

Our company offerings allow us offer turn key solutions to the cannabis industry. The automation of our KiloWatch control system allows for a repeat of grow cycle metrics. Holding several patents on our research side, developed with leading experts and universities around the world, is proving to be an invaluable resource in our development of new technologies. These optimize, regulate, and most importantly simplify cannabis operations for both growers and processors.

We understand that every grower is different, as is every strain they grow. Our goal is to deliver solutions for efficient productive outcome with the optimal mix of proven services and customization to suit any need. Contact us to learn how our decades of customer service can help you to make the most of your hard work!
